This License is issued by the American Welding Society (hereinafter referred to as "AWS") to you (hereinafter referred to as "Licensee") based upon your application and conditions:

1. By becoming a Licensee, Licensee agrees to all the terms contained in this License.
2. Licensee is authorized to reproduce this AWS B2 Standard Welding Procedure for intra-company use only. Copies may not be made available to any individual not employed by Licensee or for any purpose unrelated to the business being conducted by Licensee.
3. Any reproduction must include the following copyright notice: "Copyright by the American Welding Society. Reproduced with the express written permission of the American Welding Society."
4. Licensee may not enter into any sublicense agreement.
5. Reproduction of this Standard Welding Procedure signifies that you agree with the terms of the License. If you do not agree with the terms of this License please return this document, and a new document without the copyright notice will be issued.
6. The AWS B2 Standard Welding Procedures are not the subject of any warranty. AWS disclaims any liability arising from the use of any Standard Welding Procedure. AWS is not liable for any actual or consequential damages that may arise from the use of any Standard Welding Procedure.
7. Licensee will notify AWS in writing if it becomes aware that any employee or other party has made copies or otherwise made use of any Standard Welding Procedure contrary to the terms of the License.
8. This License contains the entire understanding as between Licensee and AWS, and any changes must be contained in a writing signed by both parties.
9. The terms of this License are governed under the laws of the State of Florida, and both parties agree to submit to the jurisdiction of the cognizant court of law within Dade County, Florida to resolve any disputes.

Approved by  
AWS Board of Directors

**Abstract**

This standard contains the essential welding variables for welding austenitic stainless steel in the thickness range of 18 through 10 gauge using manual gas tungsten arc welding. It cites the base metals and operating conditions necessary to make the weldment, the filler metal specifications, and the allowable joint designs for fillet welds and groove welds.

### Requirements for Application of SWPSs

**Scope.** The data to support this Standard Welding Procedure Specification (SWPS) have been derived from the above listed Procedure Qualification Records (PQRs) which were reviewed and validated under the auspices of the Welding Research Council. This SWPS is not valid using conditions and variables outside the ranges listed. The American Welding Society considers that this SWPS presents information for producing an acceptable weld using the conditions and variables listed. The user needs a significant knowledge of welding and accepts full responsibility for the performance of the weld and for providing the engineering capability, qualified personnel, and proper equipment to implement this SWPS.

**Application.** This SWPS is to be used only as permitted by the applicable fabrication document(s) [such as code, specification, or contract document(s)]. The fabrication document(s) should specify the engineering requirements such as design, need for heat treatment, fabricating tolerances, quality control, and examination and tests applicable to the end product.

**User's Responsibility.** A SWPS does not replace or substitute for fabrication codes, specifications,

contract requirements, or capability and judgment on the part of the user. A SWPS is to be used only as permitted by the applicable fabrication code, specification, or contract document.

The ability to produce production welds having properties suitable for the application depends upon supplementing the SWPS with appropriate performance qualification tests and sound engineering judgment. The user is responsible for the quality and performance of the final product in accordance with the provisions of the fabrication document(s).

**Supplementary Instructions.** To adapt this SWPS to a specific application, a user may issue supplementary instructions. Such instructions may consist of tighter fit-up tolerances, higher minimum preheat temperature or any other instructions necessary to produce a weldment that meets the requirements of the fabrication document(s). These instructions shall not be less restrictive than provided in the SWPS.

**Safety.** Safety precautions shall conform to the latest edition of ANSI Z49.1, *Safety in Welding, Cutting, and Allied Processes*, published by the American Welding Society.

This specification may involve hazardous materials, operations, and equipment. The specification does not purport to address all of the safety problems associated with its use. It is the responsibility of the user to establish appropriate safety and health practices. The user should determine the applicability of any regulatory limitations prior to use.
