Personnel

AWS Safety and Health Committee

D. E. Clark, Chair	<i>Idaho National Engineering Laboratory</i>
D. Werba, Vice Chair	<i>Miller Electric Manufacturing Company</i>
S. P. Hedrick, Secretary	<i>American Welding Society</i>
S. E. Ferree	<i>ESAB Welding & Cutting Products</i>
S. R. Fiore	<i>Lawrence Livermore National Laboratory</i>
K. A. Lyttle	<i>Praxair, Incorporated</i>
A. F. Manz	<i>A. F. Manz Associates</i>
K. M. Merlo	<i>Edison Welding Institute</i>
J. Petkovsek	<i>The Lincoln Electric Company</i>
M. N. Sas	<i>ITW Global Welding</i>

Advisors to the Safety and Health Committee

D. A. Fink	<i>The Lincoln Electric Company</i>
D. G. Harvey	<i>Hobart Brothers</i>
J. F. Hinrichs	<i>Friction Stir Link, Incorporated</i>
J. D. Jennings	<i>Expert Services</i>
T. Lyon	<i>Consultant</i>
D. H. Sliney	<i>Consultant</i>
R. J. Tucker	<i>Consultant</i>

Foreword

This index was prepared for the Safety and Health Committee of the American Welding Society to provide key-word search capability for the series *Effects of Welding on Health*, Volumes I through XIV. These works review and evaluate research conducted throughout the world on the potential health effects associated with physical and chemical hazards produced by different welding processes. The first volume covered research published before 1978, while the latter thirteen covered the time periods between 1978 and 2005 (the last volume also included an appendix with short summaries of articles on the effects of welding on human health published between 2006 and 2009).

Effects of Welding on Health, Index—I through XIV

A

- Abortion. *See* Spontaneous abortion
- Absenteeism. *See also* Sick leave rates
 acute respiratory infection and, **IV**:14
 hygiene and work practices, **XII**:34–35
 illness-related absences, incidences of, **V**:3
 neck and shoulder disorders, **VII**:38
 respiratory disease-related absences, **IV**:xvi, **V**:14–15, **XIII**:21–22, 69–70
- Abstract reasoning, aluminum exposure studies, **XIV**:7, 16
- A.C. power systems
 extremely low-frequency electromagnetic (ELF) exposure, **VIII**:5
 symmetrical susceptibility bridge, particle retention studies, **VIII**:27
- Accidents. *See also* Injuries
 construction welding incidents, **VIII**:24
 contact lenses in welders, **VI**:37
 cross-sectional surveys, **XIII**:20, **XIV**:27
 electrocutions, **XII**:13
 epidemiological studies, **IX**:8
 explosions, **XII**:13
 falls, **VIII**:9
 fault tree analysis, **VIII**:19–20
 hygiene and work practices, **VII**:6–7, 21, 23, **X**:9, 29, **XII**:13, 33–35
 ignition hazard analysis, **VIII**:20
 laser welding, **X**:8, 24–25
 list by employee activity, **VIII**:22, 24
 list by incident type, **VIII**:21
 maritime welding incidents, **VIII**:25–26
 neck and shoulder injuries, **IX**:11–12, 43–45
 NIOSH-HETAB field investigations, **VIII**:20
 partially chlorinated hydrocarbons, **VIII**:20
 Pakistani welders, **XIV**:12
 prevalence studies of, **XIII**:57–59
 published searches, **VIII**:19
 radiographic weld inspection, **VIII**:17–18
 research overview, **VIII**:19–23
 risk assessment studies, **IV**:11
 statistical analysis of, **I**:41, **II**:xix–xx, 22
 studies of fatalities, **VIII**:6
 working conditions and, **IX**:28–29
 by work location, **VIII**:23
- ACGIH noise exposure guidelines, **VIII**:34–36
- Actinic elastosis, epidemiologic studies, **IV**:xvii
- Actinic ray photokeratitis. *See* Keratoconjunctivitis
- Acute gastritis, welding and, **I**:34
- Acute myelocytic leukemia, **VIII**:31
- Acute nonlymphocytic leukemia, in children of welders, **IX**:37
- Acute respiratory disease
 animal studies, **IV**:25
 case studies, **VII**:8, 29–30
 Finnish welders, **I**:7–8
 fume exposure, **I**:5–7, **IV**:13–14, **VII**:8, 29–30
 nitrogen oxide exposure, **I**:5–7
 ozone exposure, **I**:5–6
 phosgene exposure, **I**:5
 prevalence of, **I**:7
 in shipyard welders, **V**:3
 siderosis and pneumoconiosis, **I**:7–11
 welding fumes and, **III**:6, **IV**:11, 13–14
- Acute toxicity studies
 aluminum exposure, **I**:xv
 animal studies, **I**:83–85, 90–91
 in guinea pigs, **I**:92–93
 in rabbits, **I**:90–91
 in rats, **I**:83–85
 toxicity variations, **VI**:45–46
 cadmium exposure, **I**:5, 7
 fume exposure studies, **II**:9–13
 gas shielded arc welding, **I**:xv
 gas welding, **I**:xv
 pneumoconiosis, causative agents, **II**:9–10
 pulmonary function tests, **II**:11–12
 pulmonary inflammation, **II**:10–11
 radiation effects, **II**:12–13
- Acute tubular necrosis in welders, chromium exposure, **IX**:46, **X**:54–55
- Adaptometry, eye and vision injuries, **VII**:36
- Adrenal gland, in welders
 epidemiological studies, **I**:36, **XIV**:38
 neuroblastoma, incidence of, **V**:33
- Adrenalin levels in welders, fume exposure studies, **VI**:9, **VI**:39–40
- Aerosol exposure. *See also* Particle analysis
 analytic studies, **VIII**:13–14, **X**:22
 animal studies
 cadmium exposure, **II**:26
 pneumoconiosis, **V**:37–39
 toxicologic effects, **III**:16–18
- Baum-Mulholland particle coagulation theory, **VI**:16
- cardiovascular effects of, **V**:3
 composition analysis, **VI**:15–16
 elimination pathways for, **III**:6–7
 fume exposure studies, **IV**:xv, **XIII**:14
