Personnel

AWS Safety and Health Committee

D. E. Clark, Chair  
Idaho National Engineering Laboratory
D. Werba, Vice Chair  
Miller Electric Manufacturing Company
S. P. Hedrick, Secretary  
American Welding Society
S. E. Ferree  
ESAB Welding & Cutting Products
S. R. Fiore  
Lawrence Livermore National Laboratory
K. A. Lyttle  
Praxair, Incorporated
A. F. Manz  
A. F. Manz Associates
K. M. Merlo  
Edison Welding Institute
J. Petkovsek  
The Lincoln Electric Company
M. N. Sas  
ITW Global Welding

Advisors to the Safety and Health Committee

D. A. Fink  
The Lincoln Electric Company
D. G. Harvey  
Hobart Brothers
J. F. Hinrichs  
Friction Stir Link, Incorporated
J. D. Jennings  
Expert Services
T. Lyon  
Consultant
D. H. Sliney  
Consultant
R. J. Tucker  
Consultant
Foreword

This index was prepared for the Safety and Health Committee of the American Welding Society to provide key-word search capability for the series *Effects of Welding on Health*, Volumes I through XIV. These works review and evaluate research conducted throughout the world on the potential health effects associated with physical and chemical hazards produced by different welding processes. The first volume covered research published before 1978, while the latter thirteen covered the time periods between 1978 and 2005 (the last volume also included an appendix with short summaries of articles on the effects of welding on human health published between 2006 and 2009).
Effects of Welding on Health. Index—I through XIV

A
Abortion. See Spontaneous abortion
Absenteeism. See also Sick leave rates
acute respiratory infection and, IV:14
hygiene and work practices, XII:34–35
illness-related absences, incidences of, V:3
neck and shoulder disorders, VII:38
respiratory disease-related absences, IV:xvi, V:14–15,
XIII:21–22, 69–70
Abstract reasoning, aluminum exposure studies, XIV:7, 16
A.C. power systems
extremely low-frequency electromagnetic (ELF) exposure, VIII:5
symmetrical susceptibility bridge, particle retention studies, VIII:27
Accidents. See also Injuries
construction welding incidents, VIII:24
contact lenses in welders, VI:37
cross-sectional surveys, XIII:20, XIV:27
electrocutions, XII:13
epidemiological studies, IX:8
explosions, XII:13
falls, VIII:9
fault tree analysis, VIII:19–20
hygiene and work practices, VII:6–7, 21, 23, X:9, 29, XII:13, 33–35
ignition hazard analysis, VIII:20
laser welding, X:8, 24–25
list by employee activity, VIII:22, 24
list by incident type, VIII:21
maritime welding incidents, VIII:25–26
neck and shoulder injuries, IX:11–12, 43–45
NIOSH-HETAB field investigations, VIII:20
partially chlorinated hydrocarbons, VIII:20
Pakistani welders, X:12
prevalence studies of, XIII:57–59
published searches, VIII:19
radiographic weld inspection, VIII:17–18
research overview, VIII:19–23
risk assessment studies, IV:11
statistical analysis of, I:41, II:xix-xx, 22
studies of fatalities, VIII:6
working conditions and, IX:28–29
by work location, VIII:23
ACGIH noise exposure guidelines, VIII:34–36
Actinic elastosis, epidemiologic studies, IV:xvii
Actinic ray photokeratitis. See Keratoconjunctivitis
Acute gastritis, welding and, I:34
Acute myelocytic leukemia, VIII:31
Acute nonlymphocytic leukemia, in children of welders, IX:37
Acute respiratory disease
animal studies, IV:25
case studies, VII:8, 29–30
Finnish welders, I:7–8
nitrogen oxide exposure, I:5–7
ozone exposure, I:5–6
phosgene exposure, I:5
prevalence of, I:7
in shipyard welders, V:3
siderosis and pneumoconiosis, I:7–11
welding fumes and, III:6, IV:11, 13–14
Acute toxicity studies
aluminum exposure, I:xv
animal studies, I:83–85, 90–91
in guinea pigs, I:92–93
in rabbits, I:90–91
in rats, I:83–85
toxicity variations, VI:45–46
cadmium exposure, I:5, 7
fume exposure studies, II:9–13
gas shielded arc welding, I:xv
gas welding, I:xv
pneumoconiosis, causative agents, II:9–10
pulmonary function tests, II:11–12
pulmonary inflammation, II:10–11
radiation effects, II:12–13
Acute tubular necrosis in welders, chromium exposure, IX:46,
X:54–55
Adaptometry, eye and vision injuries, VII:36
Adrenal gland, in welders
epidemiological studies, I:36, XIV:38
neuroblastoma, incidence of, V:33
Adrenalin levels in welders, fume exposure studies, VI:9,
VI:39–40
Aerosol exposure. See also Particle analysis
analytic studies, VIII:13–14, X:22
animal studies
cadmium exposure, II:26
pneumoconiosis, V:37–39
toxicologic effects, III:16–18
Baum-Mulholland particle coagulation theory, VI:16
cardiovascular effects of, V:3
composition analysis, VI:15–16
elimination pathways for, III:6–7
fume exposure studies, IV:xv, XIII:14
